

## Internet Access and Software Configuration

### Walker Creek Ranch

#### Walker Creek Wireless Network

Mac or PC computers with wireless capabilities can attach to any available wireless access. No password is required. Access points are currently identified as:

- **WC1**
- **WC2**
- **WCBUFFALOCONF**
- **WCBUFFALOMAPL**

In some cases, the local area network (LAN) configuration on your computer may prohibit connection to the wireless network. If this is the case:
